Painting 1

My first picture gives a very worthfull personal impression remembering holidays last year in Spain and in time it reflects my actual state of mood which is very well and optimistic.

Why that?

I feel very health, have a nice family -especially my wife is wonderful- have or had a good profession, we have a lot of enjoying in the surrounding of parish St. Jakobi and where we also both are singing in the quoire.

The picture shows safety ways for people who want to climb and want to reach the pic of mountains (success!), but there is also a way where it is better to stop and go back to places which guarantees safety (little farm house) or relaxing (bank besides away).

Nature is in harmony with me, which I respect total and it is in a good conditions (air, trees, animals). Sun is shining, there are no clouds which could darken the skys., That means for me I have no sorrows or griefs and I am living in a great harmony with my body and my soul.

The sail is the love for and under people, holy goast is the mast.

Painting 2

My second picture shows way of my life or other people. There is a way which could ends in difficulties (spirale) or it shows where little events could end in a catastrophe (circles: little causes can create great effects, like throwing a stone in the water). Further it shows a boat with white sailing which stamps and crosses the sea of life. The white sail should impress that people should do good things to other people and do not have confrontations with law and order which are necessary that society can function well. The black cross shows that dead is every time present all the time and remember that life has an end in any time.
